I am an experienced Full-Stack Developer with over four years in web and software development, proficient in technologies like Laravel, Node.js, Python, Vue.js, Nuxt.js, and React.js. I have expertise in database management with MongoDB, MySQL, and SQLite, along with experience in Ubuntu Server Management and DevOps tools. Currently, I work at Zatiq Limited, contributing to the development of e-commerce platforms. My previous experience includes Data Scraping, API Development, RESTful Services, Web Automation, and Custom Web Applications. Passionate about technology and continuous learning, I am always eager to stay updated and contribute to the tech community.

Work history

2025-02 - Current

Software Engineer Label 03

Zatiq Limited, New Elephant Raod, Dhaka

Responsibilities:

- Manage and maintain project servers, ensuring optimal performance, uptime, and security.
- Develop and maintain backend systems using **Laravel**, following clean code and standard architectural practices.
- Work on frontend development using **React.js** and **Inertia.js**, integrating seamlessly with Laravel backend.
- Collaborate with cross-functional teams to plan, develop, and deploy scalable web solutions.
- Contribute to **Zatiq Plus** — one of the company's core platforms — by enhancing features, optimizing performance, and maintaining code quality.
- Troubleshoot, debug, and resolve technical issues across both frontend and backend.
- Implement version control, deployment automation, and performance monitoring processes.

Skills & Technologies:

- Laravel, PHP
- React.js, Inertia.js, JavaScript, Tailwind CSS
- MySQL / PostgreSQL
- Server Management (Ubuntu, Nginx, Apache, cPanel)
- Git & GitHub for version control
- REST API Development and Integration

Key Achievements:

- Successfully handled complete server configuration and deployment for multiple company projects.
- Improved system stability and deployment efficiency within the Zatiq Plus ecosystem.
- Ensured smooth collaboration between backend and frontend through efficient API structure and data flow.

2023 - Current

Full Stack Web Developer

Tazamun Limited, Azijia, Makkah, KSA

- As a Full Stack Web Developer, I have experience in developing B2B and B2C-based e-commerce and POS systems. I specialize in building scalable and performance-optimized applications using Laravel, MySQL, and Vue.js. Additionally, I am skilled in creating and optimizing RESTful APIs.
- Development of B2B and B2C-based e-commerce and POS systems.
- Building scalable applications using Laravel, MySQL, Vue.js
- Creating and optimizing REST APIs

2021 - 2022

Full Stack Web Developer

Seo Expate Bangladesh Limited, Bogura

- As a Full Stack Web Developer, I have worked on the development of news portals, blogging platforms, and custom web applications. I have expertise in building high-speed applications using Laravel for both frontend and backend, creating SEO-friendly websites, and optimizing overall performance. Additionally, I have experience in MySQL database optimization and security enhancements, including XSS, CSRF, SQL Injection Protection.
- Development of news portals, blogging platforms, and custom web applications
- Building high-speed applications using Laravel for both frontend and backend.
- Creating SEO-friendly websites and optimizing performance.
- MySQL Database Optimization and Security Enhancement (XSS, CSRF, SQL Injection Protection)

2020 - 2021

Junior Web Developer

STEP UP IT, Rajshahi

- As a Junior Web Developer I Developed small and medium-scale web applications using Laravel, focusing on efficient backend development and seamless user experience. Integrated REST APIs with various third-party services, including Mailtrap, Twilio, Firebase, Stripe, and PayPal, to enhance functionality. Worked on frontend optimization, ensuring responsive UI design for compatibility across multiple devices and platforms, while also improving performance and user engagement.

2019 - 2020

Data Scraper & Automation Specialist

M/s. Mitali International, Dhaka

- Web Scraping and Data Automation using Python and Selenium, Puppeteer.
- Collecting, processing, and analyzing data using BeautifulSoup and Scrapy.

- Storing and analyzing collected data in CSV, Excel.
- Landing page design.
